Presentation

The following guidelines are provided for informational purposes only and can be modified.

The majority of courses are taught in French; therefore, a good level of French is recommended.

Objectives

- Advance linguistic skills and knowledge to improve the comprehension of selected foreign languages.
- Comprehend specialised translation techniques applied to technical sectors (economics, tourism, law) and how to use the appropriate methodological tools.
- Improve knowledge of the history, culture and society of the countries studied, while using appropriate analytical methods.
- Improve speaking and writing skills with oral presentations or professional documents writing exercises.
- Develop technical skills in the applied disciplines: law, economics, accountancy, management, office automation and IT science.

Skills

LCeR Licences Compétences en Réseau

- Understand precisely the two languages studied.
- Speak or write fluently in both languages studied.
- Speak with ease in a foreign language in front of an audience.
- Participate effortlessly in everyday conversations or in a professional context in both languages studied.

Non-contractual information.
Last update on 05 May 2026

- Write professional documents such as commercial correspondence and reports, and synthetising documents.
- Comprehend the modern societies and political, economic and social systems of the countries studied.
- Translate technical texts with all their subtleties from French to a foreign language and vice-versa.
- Use efficiently IT tools and office automation.
- Relate linguistic and cultural competencies to the knowledge learned in applied disciplines (law, computer and IT science, economics, management).

International dimension

During their studies, students will have the opportunity to study abroad through the partnerships of Artois University, including exchange programs such as Erasmus+ or other exchange agreements signed and authorised between Artois University and its foreign partners.

To learn more about the options to study abroad, you can visit the International page on the Artois University website.

For further information, contact the Internation Relations Office: https://www.univ-artois.fr/international/contacts-du-service-des-relations-internationales

Students in the 'International Excellence' specialisation in third year must find an internship abroad.

Additional information

- Students work in small groups so that the teachers can give personalised feedback and better support. During their first year, students focus on learning the basics. In their second year, they have to choose a specialisation.
- During classes and on their own, students work on defining their orientation goals and discover the professional world.
- An internship is mandatory for third-year students, and optional for second-years, so that students can be efficiently prepared to enter the professional world.
- The course is taught by university lecturers and researchers, along with external professionals in partnership with the university, such as local authorities, businesses, associations or public agencies.
- The students have the opportunity to study abroad for one semester up to one year through various exchange programs and partnerships or dual degrees.
- Students in the 'International Excellence' subprogram must find an internship abroad.

Organisation

Universal adjustments

Special accommodations
If you have any accommodation requirements (campus accommodation or productivity tools), you can get in touch with the Mission Handicap team. They will help you contact all services and coordinate with all of them to get the support you need.

Non-contractual information.
Last update on 05 May 2026

The majority of courses offered at Artois University are taught in French, although there are a certain number of undergraduate and postgraduate courses with English options. A good understanding of the French language (at least B1 Level) is therefore necessary in most cases.

Inscription modalities

To see if you fit the requirements to apply for the course, please consult this page (in French) : https://www.univ-artois.fr/admission.

For further information, contact the International Relations Office:
https://www.univ-artois.fr/international/contacts-du-service-des-relations-internationales

Fees

The tuition fees depend on the course, the type of degree, the student's situation and their nationality.
To learn more about study costs: https://www.etudiant.gouv.fr/fr/droits-d-inscription-1489

And after

Further studies

- A Master's degree in **Foreign Languages Applied to Business – specialty International Management** which prepares students for international trade, particularly in sales and negotiation, through proficiency in three foreign languages and an understanding of the societies within their linguistic regions and thanks to the multidisciplinary dimension of the teachings (law, management, logistics, marketing, IT science, intercultural mediation, sales).
- The online Master's degree in **Teaching Chinese as Foreign Language** is aimed at students wishing to teach Chinese in schools or in enterprises in France or in foreign countries. Students are taught high-quality linguistic and pedagogical skills to teach Chinese as a second language.
- A Master's degree in **Teaching and Education** that can only be entered after passing a teaching entrance exam.

Professional insertion

- International trade, business, import-export, marketing.
- Specialised (technical, business, legal) translation and interpreting.
- Administration, accounting and management in international enterprises.
- Tourism, transport and logistics.
- Information and communication, civil service and public sector.

UNIVERSITÉ D'ARTOIS

Program

Organization

- The students must choose two languages to study during this course. The options are English/German, English/Spanish, or English/Chinese.
- English, German and Spanish are taught at a B2 level while Chinese starts at beginner level in the first year.
- From the first semester to the sixth one, the core classes are structured around two axes:
  - Language and culture: civilisation, general culture, grammar, specialised translation, written and oral expression.
  - Applied disciplines: law, economics, accountancy, management, computer science, office automation.
- In the second year, in addition to the core course, students have to choose a specialisation to study until their last year. They can choose between three subprograms: **International Trade and Exchanges**, **Public Sector and Civil Service Training** or **International Excellence** during which an internship abroad is mandatory.
- Depending on the specialisation, this undergraduate degree can lead to careers in teaching or civil service after entrance exams.
